DE LA CRUZ, AMOSS WIN THOROUGHBRED TITLES

Hoosier Park Press Release - Hoosier Park Racing & Casino's concluded the 2012 Thoroughbred meet on Saturday, October 27th awarding Fernando De La Cruz with his first leading jockey title. The Peruvian jockey won 68 races to finish nine victories in front of Hoosier Park's two-time defending leading jockey winner, Leandro Goncalves.

De La Cruz earned more than \$1.3 million in purse earnings during the 64-day meet.

In the midst of his best season to date, De La Cruz has already posted over \$3.1 million in purse earnings and ridden 155 winners in 2012. He has also posted four consecutive seasons with purse earnings toppling the \$2 million mark. In 2011 alone, De La Cruz bankrolled over \$3.5 million in purse earnings with 170 trips to the winner's circle, many of which were accumulated between Hoosier Park and Indiana Downs.

De La Cruz has relocated to Churchill Downs before heading to Tampa Bay Downs for the winter. De La Cruz plans to return to the Indiana circuit in the spring when racing resumes.

"I'm very thankful to all the trainers that gave me the chance to ride some great horses," De La Cruz noted. "Indiana has been very good to me and my family and I can't wait to get back."

In the trainer ranks, Tom Amoss won an allowance optional claiming event with Senor Rain on the closing day card to edge out three-time

Hoosier Park leading trainer, Gary Patrick by one victory. With 25 trips to the winner's circle, Amoss saddled the winners of over \$506,000 in purse earnings throughout the meet to take home his second leading trainer title at Hoosier Park.

A native of New Orleans, Louisiana, Amoss has nine previous leading trainer titles to his credit with titles at Churchill Downs, Ellis Park, Kentucky Downs and the Fairgrounds.

Amoss, 50, has started more than 10,700 horses and has won over 2,400 of those starts. For 12 years in a row, he has won more than 100 races, and in 2011 Amoss sent out a career-best 163 winners, bankrolling over \$4.3 million in purse earnings. The multiple Graded Stakes winning trainer has recently worked as a racing analyst for TVG and ESPN.

Amoss was followed in the standings by Gary Patrick with 24 wins and Walter Abner, who ended the season with 23 wins.

Gary Patrick didn't go home empty-handed as he took home the leading owner trophy with 22 victories. A native of Ohio, the trophy notched Patrick's third leading owner title in the 18-year history of Hoosier Park. Patrick also earned leading owner honors during the 1998, and 2011 seasons. Henry Mast's Mast Thoroughbred, LLC finished second with 11 wins.

Oaks, the \$100,000-added Michael G Schaefer Memorial Mile, and the \$100,000-added Mari Hulman George stakes. Racing begins Indiana Derby day at 12:30 p.m. EST.

QUALITY CONTROL REQUIREMENTS ADDED FOR NORTH AMERICAN NON-LISTED BLACK-TYPE RACES

Press release at www.jockeyclub.com Monday, November 19, 2012

Contact: Carl Hamilton (859) 224-2800

The following news release is on behalf of the North American International Catalogue Standards Committee.

The North American International Catalogue Standards Committee (NAICSC) today announced that effective January 1, 2014, additional quality control requirements will be implemented for races in North America eligible for non-Listed black-type in SITA catalogues (those compliant with guidelines required by the Society of International Thoroughbred Auctioneers).

Non-Listed black-type races include open stakes races with a purse between \$50,000 and \$74,999 and all stakes races with a purse of \$50,000 or more that have a restriction allowed by NAICSC (i.e., state bred, stallions' progeny, sales graduates or non-winners of a sweepstakes).

The new requirements include the addition of a minimum Race Quality Score (RQS) for individual age/sex divisions. Statistics used in the evaluation of Graded and Listed races, including ratings provided by the North American Rating Committee, are not available for non-Listed black-type races. The RQS provides an alternative quality control measurement for these races.

The RQS is a composite number compiled by using speed figures for the first four finishers in each race over three years. Four speed figures are used to compile the RQS and are provided by Bloodstock Research Information Systems (BRIS), Daily Racing Form (Beyer), Equibase and Thoro-Graph.

The attached document provides an overview of North American black-type requirements that will become effective January 1, 2014. In January of 2013 a website (northamericanicsc.com) will be made available that will include a listing of non-Listed black-type races with their RQS and the minimum RQS requirements for each age/sex division.

Current North American black-type rules will stay in effect for 2013, and the minimum purse requirement for SITA black-type races will remain at \$50,000.

Also, as announced last year, the American Graded Stakes Committee and the Canadian Graded Stakes Committee will evaluate eligible races for Listed status at their upcoming grading sessions using the same technique and information, including fact-based statistical analysis, that is used during their annual evaluation of Graded Stakes races. Races not deemed to be of Listed quality using this process will lose their Listed status beginning in 2013 and be treated as other non-Listed black-type races.

**NORTH AMERICAN BLACK-TYPE REQUIREMENTS
EFFECTIVE JANUARY 1, 2014**

In 2014, for a stakes race in the United States and Canada to receive black type in SITA catalogues, it must:

- have a minimum purse value of \$50,000 distributed on the day of the race
- have a Black-Type Race Quality Score equal to or above the established minimum Race Quality Score for its age/sex division
- close at least 72 hours in advance of its running, have a fee paid by the owner of the entrant, and have a total purse value distributed on the day of the race equal to or greater than the established minimum
- have all entries be eligible for the purse monies used to determine the minimum purse value for black type or Listed status
- not have restrictions other than state-bred, non-winners of a sweepstakes, sales graduates or stallions' progeny
- not contain a preference clause(s) based on criteria unrelated to the quality of the horse if such preference clause(s) could possibly exclude any horse(s) of superior quality from competing

A Black-Type Race Quality Score is the average of the Annual Race Quality Score for each of a race's last three renewals. The Annual Race Quality Score is the combination of the speed figures assigned to a race by Bloodstock Research Information Systems (BRIS), Daily Racing Form (Beyer), Equibase and Thoro-Graph. The speed figure assigned to a race is the average of the speed figure assigned to the top four finishers in the race.

If a race has a Black-Type Race Quality Score and an Annual Race Quality Score for the most current renewal below the established minimum Race Quality Score for its age/sex division, then it will lose its black-type status.

A race that is not conducted for two consecutive years will lose its black-type status.

For turf races the three most current turf renewals will be used to calculate the Black-Type Race Quality Score.

A race that has lost black-type status must be conducted two times subsequent to losing its blacktype status before being evaluated for reinstatement of black-type status. The race must have a Black-Type Race Quality Score and an Annual Race Quality Score for the most current renewal equal to or above the established minimum Race Quality Score for its age/sex division in order for black-type status to be reinstated.

Starting in 2014 and thereafter, new races created and existing races with material changes to their conditions will be submitted to a committee of the International Catalogue Standards Committee (ICSC) for review prior to the inaugural running to determine if the inaugural running will receive black-type status. To be eligible for review by a committee a new race must have a minimum purse of \$75,000 available to all entries and appear in the track's published stakes book. New races eligible for review and existing races with material changes to the conditions must be submitted to the committee no less than 30 days prior to the start of a track's race meet in which the new race is to be run.

A race granted black-type status for its inaugural running will need to run under essentially the same conditions for each of its first two renewals, including having a purse of no less than \$75,000 available to all entries, and achieve an Annual Race Quality Score for each of its first two renewals equal to or above the minimum Race Quality Score for its age/sex division. The inaugural running must achieve an Annual Race Quality Score equal to or above the minimum Race Quality Score for its age/sex division for the second running to maintain black-type status.

New races created in 2014 and thereafter with a purse of less than \$75,000 available to all entries must run twice under essentially the same conditions before being evaluated for black-type status. To receive black-type status for its third running a new race will need to achieve an Annual Race Quality Score for each of its first two renewals equal to or above the minimum Race Quality Score for its age/sex division.

Notice of race name changes must be submitted to a committee of the ICSC no less than 30 days prior to the start of a track's race meet in which the race is to be run.
